Create a new repository
A repository contains all the files for your project, including the revision history.
Owner
Repository name *
josejimenezromero
/
prueba
Great repository names are short and memorable. Need inspiration? How about fuzzy-fortnight.
Description (optional)
Public
Anyone can see this repository. You choose who can commit.
Private
You choose who can see and commit to this repository.
Initialize this repository with a README
This will let you immediately clone the repository to your computer. Skip this step if you're importing an existing repository.
Add .gitignore: None
Add a license: None
